

# **PROGRAM**

**Environment:** Windows 10

**Tools/Language:** Python

**Objective:** Python program to remove Punctuations from a String.

**Code: -**

```
s={"!", "@", "#", "$", "%", "^", "&", "*", "(", ")"}
s1=input("Enter the string: ")
s2=""
for i in s1:
    if i not in s:
        s2=s2+i
print("string after remove punctuation:",s2)
```

**Output: -**

```
= RESTART: C:/Users/krous/OneDrive/Documents/Python Program File/square root.py
Enter the string: Welcome! @to Py#thon Lab*
string after remove punctuation: Welcome to Python Lab
|
```
